

Module 1: Work Order Management

Tab 12: Permit Closing Certificate (Balady)

1. Overview

This is the final operational tab for closing out the project with the municipal authorities. Its sole purpose is to consolidate all necessary documentation into a single, compliant package for submission to the Balady platform. Successfully closing the permit is critical to avoid daily penalties. The final output of this process is the official **Site Clearance Certificate** issued by Balady.

2. Workflow

- 1 **Document Checklist:** Upon opening the tab, the user is presented with a checklist of all documents required by Balady for permit closure.
- 2 **Automatic Collation:** The system automatically locates and links to all the required documents and media from the previous tabs.
- 3 **Package Generation:** The user clicks a Generate Permit Closing Package button. The system then compiles all the selected documents, photos, and videos into a single, organized PDF file. This file is optimized for upload to the Balady platform.
- 4 **Manual Upload to Balady:** The user downloads the generated PDF package and manually uploads it to the Balady government platform.
- 5 **Upload Site Clearance Certificate:** Once Balady processes the submission and issues the official **Site Clearance Certificate**, the user uploads this final certificate back into our system.
- 6 **Completion:** The process is complete once the Site Clearance Certificate is uploaded. This action marks the **Permit Close** milestone on the main Work Order dashboard as complete.

3. Document Checklist and Consolidation

The interface will present the following checklist. The system will automatically gather these assets from the corresponding tabs.

- **13.01 Follow-up report:**
 - A system-generated summary report detailing the entire project lifecycle, including key dates, personnel involved, and a summary of work performed.
- **13.02 Before Work Photos:**
 - All photos from the "Photos prior to site safety preparations" group in the **Excavation** tab.
- **13.03 During Work Photos + Video:**

- A collection of representative photos and videos from the **Excavation**, **Electrical**, and **Civil** tabs.
- *(Note: Video capture will need to be added as a feature to the relevant photo-taking sections in the Excavation, Electrical, and Civil tabs.)*
- **13.04 After Work Photos + Video:**
 - All photos from the "Before & After Verification" section of the **Civil** tab.
- **13.05 Lab Test Result:**
 - The final, signed-off lab test reports from the **Civil** tab.
- **13.06 Certificates of Completion:**
 - All finalized certificates from **Tab 8: Certificates of Work Completion**.

4. Final Step: Site Clearance Certificate

- There will be a dedicated upload area in this tab for the final **Site Clearance Certificate**.
- **Field:** Upload Site Clearance Certificate
- **Data Type:** File (PDF)
- **Action:** Uploading a file to this field and clicking "Save" will trigger the completion of this tab and the entire permit closure process.
